

Howie Robinson Indoor Golf and Learning Center

There are several great options for fun and game improvement with the new golf and leaning center utilizing the P3proswing software.

Instruction

The new P3ProSwing golf swing analysis software is a tremendous tool for a golf professional to help you reach your goals on the course. It reads your golf swing, and gives you an instant report on what's going on. After every shot, the P3ProSwing golf swing analysis software precisely measures key metrics of your swing, such as swing path, club face angle, angle of approach and club sweet spot and instantly displays them on the computer screen. This analysis is presented in both text and graphical form, which makes understanding your swing dynamics easier. With the aid of an instructor and use of the 2 camera video analysis you will be on your way to factually knowing where your swing faults are and what can be done to correct them.

Club fitting

The software gives the most accurate information when you are looking to purchase that new driver or set of irons. It precisely measures club-head speed, heel-toe distance from the ground for lie angle, swing path and angle of attack. There is really no guessing involved. When you are making that kind of investment in your game leave no room for error, let the professionals at Bonnie Brook fit you with clubs at great prices that will help you enjoy this great game even more.

Virtual Golf & Fun!

If it is a rainy day or there is snow on the ground, play 18 holes on the virtual simulator. Play a round on the Beautiful Desert Dunes or Highlands championship course. Feel like you're playing an actual round at a fraction of the price. During offseason players may make reservations during specific times up to 2 weeks in advance by calling the pro shop 847 360-4730 extension 2. Don't delay start having fun with the new P3proswing today!
